RISK ASSESSMENT

Assessment title:	Egg drop challenge		
Date of risk assessment:	20/06/25	Risk assessment carried out by:	Lewis Morgan

Likelihood: how likely is it that the harm presented by the hazard will actually occur?	Severity: what impact or damage could the harm presented by the hazard have on a person or persons?
High (3): Harm is certain, or near certain, to occur	High (3): Death or major injury
Medium (2): Harm will often occur	Medium (2): 7-day injury or illness
Low (1): Harm will seldom occur	Low (1): All other injuries or illnesses

Risk rating: Once the likelihood and severity have been determined, the risk can be calculated as shown below:

		Likelihood		
		3	2	1
Severity	3	High	High	Medium
	2	High	High	Medium
	1	Low	Low	Low

The Management of Health & Safety at Work Regulations 1999 places a legal duty on employers to carry out risk assessments, and to make a written record if there are more than 5 employees.

RISK ASSESSMENT

Haz No	Significant Hazards Look only for hazards which you could reasonably expect to result in significant harm	People affected	Risk rating L x S = R			Control measures e.g. physical safeguards, training, PPE etc	Residual risk rating L x S = R		
			L	S	R		L	S	R
1	Contact with allergens	Any persons within group	2	3	H	• Group asked to provide list of allergies prior to arrival. • Group not given egg until it is ready to be dropped. • Group instructed not to touch cracked eggs. • Group instructed to wash hands after activity or after contact with raw egg.	1	2	M
2	Trips, slips and falls	Any persons within group	2	2	M	• Group are led by leader at all times. Limited number of children called up at a time. • Egg drop area kept clear of obstructions and hazards.	1	2	M
3	Falling from height	CET instructor	2	3	H	• Instructor to use appropriate ladder to drop eggs from. • Instructor to inspect ladder for defaults prior to use.	1	2	M
